

## Curtain CALL

The next time you pick out curtain rods, be sure to check out Mukul Goyal's Tattva line of "art hardware." We like the creative touches that he's introduced in what is traditionally considered a rather mundane fixture. Goyal's curtain rods are enlivened by sunbursts, human figures, leaves and twigs—making each an innovative work of art. Plus, they come in finishes such as stainless steel, chromed brass, matt gold and antique copper and nickel.
